

# BIZNOVATOR

## CSR COMMUNITY

**BIZNOVATOR** partners with major corporations to bring unique youth empowerment opportunities to the community. More than ever the world needs more mindful companies who prioritize sustainability and community outreach as a key driver in helping them meet their business objectives. Governments, citizens and most importantly, the next generation workforce prioritize sustainability as a key enabler for societal progress and an equitable future for all. These are macro forces that are global in nature and will only continue to gain momentum. For this reason, **BIZNOVATOR** has developed our **BIZNOVATOR CSR COMMUNITY** Program that enables corporations to engage schools and community organizations to empower young people to become better prepared for their futures. Our programs directly map to the United Nations Sustainable Development Goals and demonstrate real world impact through corporate engagement in the experiential learning of young people.

Our program includes the complete **DISCOVER, TRANSFORM, CONNECT** experiential learning methodology bringing our expertise to the community. In order for today's youth to successfully meet their future potential in a rapidly changing global marketplace they require early exposure to a broad range of teachings and skillsets. These are the skillsets that the world's most successful business leaders, professionals, and entrepreneurs, possess and exhibit on a daily basis. These include; advanced leadership, decision-making, communications, team building, financial and strategic planning.

The **BIZNOVATOR CSR COMMUNITY** Program is built on the core principles of *Entrepreneurship, Social Innovation* and *Global Leadership* and is completely customizable and developed in a collaborative approach with our corporate partners. We have seen amazing results with our young people and see the need for even more corporations to commit to developing human capital at an even earlier age.

Through a **BIZNOVATOR** partnership, your corporation can impact the lives of young people in a profound way, putting them on the path towards their future success.

- Engage your employees in the community.
- Engage with local educational institutions; K-12, colleges and universities
- Empower the next generation of social innovators and global leaders.
- Enhance your BRAND through Youth Empowerment and Sustainability.
- Measure Social Impact through the Sustainable Development Goals.
- Build a Culture of Community.
